Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 1-5 and 7-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Bishop et al. Bishop et al. discloses, Figs. 1, 2, 12, and 14, energy dissipating assembly having a plurality of modules attached together as by cables extending through passages 56 located within yokes 44 which yokes are connected to a plurality of walls 32, 28, 36, etc. Anchoring means for anchoring the bodies in the water at select positions is as at 24/26. Ribbed areas are formed as at 60/36, 28/40 with a plurality of ridges and grooves, or channels, thus formed along the faces, (plurality of ridges are along each of 42, or intersection of 40/28, for example with a plurality of grooves, or channels, shown along each of the intersection of 54/60, for example). Buoyancy means to adjust the buoyancy is at 64 in the form of apertures and closure means.

Art Unit: 3673

3. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments filed September 24, 2003 have been fully considered but they are not persuasive. As set forth in the above rejection of claims 1-5 and 7-13, Bishop et al. does serve to read upon "a plurality of at least one of protrusions, ridges, grooves and channels formed on said ribbed outer surfaces". The surfaces of Bishop et al., though characterized by Applicant as smooth, do possess a rib such as at 60/36 or 28/40 with such surfaces also possessing ridges and grooves, or channels, as set forth in the above rejection.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however,

Art Unit: 3673

will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. Safavi whose telephone number is (703) 308-2168.
